Southfield Store: Bob Tynan reported that it looks like upper trench was full in June. The tanks were pumped in July. Two ports had 1" of effluent in each one, some leaking through, no break-outs so far. A date was set of Monday, <sup>Aug</sup> July 19<sup>th</sup> at 11:00AM with Scott, Jack and Larry to visit the site. Usage of water was noted at 560 Gal per day but is slowing down now. The Gershell property at 646-648 Hayes Hill Rd. has a permit which covers 3 lots with caveats to be in final septic design.

The Williams property at 122 Clayton-Mill River is up for sale. They have received an offer from Robert Boseman stating he will be responsible for any Title 5 and the necessary repairs, etc., However it seems the sellers are making other demands.

The Rossier property at 222-226 Lake Rd.: Mr Rossier wants to sell 2 of the cottages and keep one. He must have systems on the lots they are serving. The systems will use the FAST System which is fiberglass tanks above the water table. The FAST system treatment has an oxygenator in the tank that oxygenates the water heading out of the tank. There is an existing FAST system in place that is still functioning.

The meeting adjourned at 8:45PM.

Respectfully submitted,
